Risk Adjustment

Risk Adjustment in Health Care

- A mechanism used in health insurance to account for the overall health and expected medical costs of each individual enrolled in a health plan.
- Found in Medicare Advantage, Medicaid managed care, Marketplace, and commercial insurance.

Why Risk Adjustment is Necessary

- Directs resources to sicker members whose care is more costly.
- Ensures members have access to adequate resources and quality care.
- It is important that clinicians document clinical diagnoses accurately to ensure that members receive the appropriate care management for ALL their conditions.
- Accurately identifying illness is key to a comprehensive approach to medical care.
- Our mission is to encourage early identification of illness, coordinate proper care and improve health outcomes.

Benefits to Members and Providers

Encourages physicians to accurately document their patients' conditions.

- *We offer education and feedback for documentation and coding improvement*

Helps to identify gaps in clinical documentation.

- *We partner with our provider entities to collaborate on risk adjustment related initiatives.*

Creates opportunity for those high-risk individuals to be identified for care management or disease intervention programs.

- *We offer a variety value-added services (VAS) for eligible members to improve their well-being.*

Continuity of Care Program

2022 Continuity of Care Program (CoC) Summary

- This initiative incorporates Appointment Agendas, HEDIS measures, and pharmacy metrics into one comprehensive program
- Designed to support outreach to members for annual visits and condition management
- Increases visibility into members' existing medical conditions
- Potential to earn bonus payments for coordinating preventative medicine and addressing chronic conditions

Program Definitions

CoC Provider - A provider, group, or Independent Practice Association (IPA) who has a contract with the health plan and receives this program information guide.

Appointment Agenda - A guide to help providers review gaps in an eligible member's care during an office visit. This document contains care gaps and health conditions derived from reviewing the member's historical claims data and identifying chronic conditions for which data indicates documentation and care are required

Eligible Member - A member specifically identified by the health plan as having a health condition(s) or care gap(s) for which we are seeking

Program Definitions

Effective Date - Program starts February 2022 for dates of service January 1, 2022 through December 31, 2022

Bonus - The additional reimbursement beyond the contracted rates in the participation agreement that a CoC provider may receive if CoC requirements are met.

Hierarchical Condition Category (HCC) - sets of medical codes that are linked to specific clinical diagnoses

Program Information

CoC providers can potentially earn bonus payments in calendar year 2022 by updating eligible members' health history, closing care gaps, and helping to ensure eligible members take prescribed medication.

Bonus payments are triggered through the normal claim administration process.
