

HEDIS® Measurement Year 2022 At-A-Glance Behavioral Health Measures

We value everything you do to deliver quality care to our members — your patients — to ensure they have a positive healthcare experience. There are several HEDIS® behavioral health measures that providers can directly impact related to follow-up care for mental illness or substance use disorders, medication adherence, and metabolic monitoring. That's why we've created this easy-to-use At-A-Glance Toolkit. It will give you the tools you need to meet, document, and code HEDIS® measures. Together, we can provide the care and services our members need to stay healthy while also improving our quality scores and Star Ratings. Please contact your Provider Relations Representative if you need more information or have any questions.

HEDIS® Measure	Intent and Recommendations	Coding and Services
<p>Follow-Up Care for Children Prescribed ADHD Medication (ADD)</p> <p><u>Measure Specifications:</u> The percentage of children newly prescribed ADHD medication (no claims for 120 days prior) who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed. Two rates are reported:</p> <ol style="list-style-type: none"> 1. Initiation Phase. The percentage of members ages 6-12 with a prescription dispensed for ADHD medication who had one follow-up visit with a practitioner with prescribing authority during the 30-day Initiation Phase. 2. Continuation and Maintenance (C&M) Phase. The percentage of members ages 6-12 with an ambulatory prescription dispensed for ADHD medication who were on the medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended. <p><u>Applicable Lines of Business:</u> Medicaid</p> <p><u>Age Group:</u> 6-12 years</p>	<p><u>Measure Intent:</u> Provides an opportunity to track medication use in patients and provide the appropriate follow-up care to monitor clinical symptoms and potential adverse events.</p> <ul style="list-style-type: none"> • Complete a comprehensive medical and psychiatric exam, including checklists for rating ADHD symptoms before diagnosing and prescribing. • When prescribing a new ADHD medication, limit to a 14- to 21-day supply and schedule a follow-up visit before the patient or legal guardian leave the office to assess how the medication is working and to address any side effects. • Educate and encourage the patient and parent or guardian to attend follow-up appointments monthly until the child’s symptoms have stabilized, then every 3-6 months for continued assessment of learning and behavior. If parents or guardian cancel the patient’s appointment, be sure to reschedule right away to keep within measurement time periods. • Submit the correct billing codes and utilize telehealth options if needed. 	<p>** CPT® Codes for Initiation, Continuation and Maintenance Phases: 96150-96154, 98960-98962, 99078, 99201-99205, 99211-99215, 99217-99219, 99241-99245, 99341-99345, 99347, 99348-99350, 99381-33387, 99391-99397, 99401-99404, 99411-99412, 99483, 99510</p> <p><u>Important Reminder for Continuation and Maintenance Phases of Treatment:</u></p> <p><i><u>Only one of the two visits (during days 31–300) may be an e-visit or virtual check-in.</u></i> (**CPT® codes 98969, 98971, 99421 - 99444, 99457, G0017, G2010, G2012, G2061 - G2063)</p> <p><u>ADHD Medications:</u> Dexmethylphenidate, Lisdexamfetamine, Methamphetamine, Dextroamphetamine, Methylphenidate, Clonidine, Guanfacine, Atomoxetine</p>

This document is an informational resource designed to assist licensed healthcare practitioners in caring for their patients. Healthcare practitioners should use their professional judgment in using the information provided. HEDIS® measures are not a substitute for the care provided by licensed healthcare practitioners and patients are urged to consult with their healthcare practitioner for appropriate treatment. HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

<p>Exclusion(s): Members in hospice or with a diagnosis of narcolepsy</p> <p>Measurement Period: <i>The 12-month window starting March 1 of the year prior to the measurement year and ending the last calendar day of February of the measurement year.</i></p>	<p>Before prescribing ADHD medication to younger Medicaid patients, please refer to the Preferred Drug List (PDL) on the health plan's state-specific website.</p>

HEDIS® Measure	Intent and Recommendations	Coding and Services
<p>Antidepressant Medication Management (AMM)</p> <p><i>*Applicable Foster Care Measure</i></p> <p>Measure Specifications: The percentage of members ages 18 and older who were newly treated with an antidepressant medication (no claims for a period of 105 days prior) with a diagnosis of major depression and who remained on an antidepressant medication treatment. Two rates are reported:</p> <ul style="list-style-type: none"> • <i>Effective Acute Phase Treatment.</i> Members who remained on an antidepressant medication for at least 84 days (12 weeks). • <i>Effective Continuation Phase Treatment.</i> Members who remained on an antidepressant medication for at least 180 days (6 months). <p>Applicable Lines of Business: Medicaid Medicare Marketplace</p> <p>Age Group: 18 years and older</p> <p>Exclusion(s): Members who are in hospice or members who do not have a diagnosis of major depression</p> <p>Measurement Period: The 12-month window starting on May 1 of the year prior to the measurement year and ending on April 30 of the measurement year.</p>	<p>Measure Intent: Provides an opportunity to track antidepressant use in patients and provide appropriate follow-up care to monitor clinical worsening and/or suicide risk.</p> <ul style="list-style-type: none"> • Before diagnosing a patient with major depression, complete a comprehensive medical exam, including lab testing, which may identify a metabolic cause of depression. Accurate diagnosis drives appropriate treatments and interventions. Rule out medical or mental disorders that can produce symptoms similar to depression. • Manage patient’s depression with a systematic approach for accurate assessment and diagnosis. Begin with a nationally recognized tool such as the Patient Health Questionnaire (PHQ-9) using the billing code 96127 in conjunction with the ICD-10 diagnosis code Z13. <p>Engaging with and educating patients is the key to medication compliance. Consider taking these steps:</p> <ol style="list-style-type: none"> 1. Discuss how to take antidepressants, how they work, their benefits, and how long to take them. 2. Tell your patients how long they can expect to be on an antidepressant before they start feeling better. 3. Stress the importance of taking the medication even if they begin feeling better. 	<p>Antidepressant Medications: Bupropion, Vilazodone, Vortioxetine, Isocarboxazid, Phenelzine, Selegiline, Tranylcypromine, Nefazodone , Trazodone, Amitriptyline-chlordiazepoxide, Amitriptyline-perphenazine, Fluoxetine-olanzapine, Desvenlafaxine, Duloxetine, Levomilnacipran, Venlafaxine, Citalopram, Escitalopram, Fluoxetine, Fluvoxamine, Paroxetine, Sertraline, Maprotiline, Mirtazapine, Amitriptyline, Amoxapine, Clomipramine, Desipramine, Doxepin (>6 mg), Imipramine, Nortriptyline, Protriptyline, Trimipramine</p>

This document is an informational resource designed to assist licensed healthcare practitioners in caring for their patients. Healthcare practitioners should use their professional judgment in using the information provided. HEDIS® measures are not a substitute for the care provided by licensed healthcare practitioners and patients are urged to consult with their healthcare practitioner for appropriate treatment. HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

	<ol style="list-style-type: none"> 4. Talk about common side effects, how long they may last, and how to manage them. 5. Let your patient know what to do if they have questions or concerns. 6. Monitor with scheduled follow-up appointments. 7. Ask the patient to consider a psychotherapy referral. This may increase the chances of staying on medication and decrease the likelihood of a recurrence. <p>Before prescribing antidepressant medication to your Medicaid patients, please refer to the Preferred Drug List (PDL) on the health plan's state-specific website.</p> <p>Before prescribing antidepressant medication to your Medicare patients, please refer to the health plan's formulary.</p>

<p>Follow-Up after Emergency Department Visit for Mental Illness (FUM)</p> <p>*Applicable Foster Care Measure</p> <p>Measure Specifications: The percentage of emergency department (ED) visits for members ages 6 and older with a principal diagnosis of mental illness or intentional self-harm who had a follow-up visit for mental illness. Two rates are reported:</p> <ol style="list-style-type: none"> 1. The percentage of ED visits for which the member received follow-up care within 30 days of the ED visit (31 total days). 2. The percentage of ED visits for which the member received follow-up care within 7 days of the ED visit (8 total days). <p>Applicable Lines of Business: Medicaid Medicare</p> <p>Age Group: 6 years and older Exclusion(s): ED visits that resulted in any inpatient stay the day of or within 30 days. Members in hospice.</p> <p>Measurement Period: Jan. 1 through Dec. 1 of a given calendar year.</p>	<p>Measure Intent: Research suggests that for people with serious mental illness, both low-intensity interventions, such as appointment reminders, and high-intensity interventions, such as assertive community treatment, can be effective following an ED visit. These interventions encourage follow-up care in the outpatient setting.</p> <p>Follow-up visits can occur on the same day as the ED discharge</p> <ul style="list-style-type: none"> • Schedule the 7-day follow-up visit within 5 days to allow flexibility in rescheduling. • If the member’s appointment does not occur within the first 7 days post-ED visit, please schedule the appointment to occur within 30 days post-ED visit. • Keep in mind that patients in an ED setting may have a medical <i>and</i> comorbid mental health diagnosis, so communication with the patient’s PCP or medical specialist may be helpful in getting the patient into treatment for their mental illness. • Utilize telehealth options if needed. <p>The follow-up visit must have a principal diagnosis of a mental health disorder or intentional self-harm.</p>	<p>*ICD-10 Mental Illness Diagnosis <u>Codes:</u> F03.9x, F20-25.xx, F28-34.xx, F39-45.xx, F48.xx, F50-53.xx, F59-60.xx, F63-66.xx, F68-69.xx, F80-82.xx, F84.xx, F88-93.xx, F95.xx, F98-99.xx</p> <p>* ICD-10 Intentional Self-Harm <u>Diagnosis Codes</u> example: T39.92XA</p> <p><u>Visit Setting Unspecified **CPT®</u> <u>Codes:</u> 90791-90792, 90832-90834, 90836-90840, 90845, 90847, 90849, 90853, 90875-90876, 99221-99223, 99231-99233, 99238-99239, 99251-99255</p> <p><u>BH Outpatient **CPT® Codes:</u> 98960-98962, 99078, 99201-99205, 99211-99215, 99241-99245, 99341-99345, 99347-99350, 99381-99387, 99391-99397, 99401-99404, 99411-99412, 99483, 99492-99494, 99510</p> <p><u>BH Outpatient HCPCS:</u> G0155, G0176-G0177, G0409, G0463, G0512, H0002, H0004, H0031, H0034, H0036, H0037, H0039, H0040, H2000, H2010-H2011, H2013-H2020, T1015</p> <p><u>Partial Hospitalization POS:</u> 52</p> <p><u>Partial Hospitalization/Intensive Outpatient HCPCS Codes:</u> G0410-G0411, H0035, H2001, H2012, S0201, S9480, S9484-S9485</p> <p><u>Community Mental Health Center POS:</u> 53</p> <p><u>Electroconvulsive Therapy **CPT Codes:</u> 90870</p>
