

# Child and Adolescent Well-Care Visits (WCV) Provider Tip Sheet

## What is being measured?

This measure assesses the percentage of members 3-21 years of age, as of December 31, who had at least one comprehensive well-care visit with a PCP or an OB/GYN practitioner during the measurement year.

## Why is this measure important?

Assessing physical, emotional, and social development is important at every stage of life. Well-care visits provide an opportunity for providers to evaluate members' health and development and are a critical opportunity for screening and counseling.

## Eligible Population

All members between the ages of 3 and 21 years old.

## Medical Record Documentation

Acceptable medical record documentation includes:

- A well-care visit with the PCP or OB/GYN in the measurement year.
- A comprehensive well-care visit may be completed during a visit for a chronic or acute condition.
- Synchronous telehealth visit.

Documentation must include evidence of a health, physical developmental, mental developmental history, and a complete physical exam.

## Coding Guidance

| CPT Codes                 | ICD-10 Codes   |
|---------------------------|--|
| 99381-85, 99391-95, 99461 | Z00.00, Z00.01, Z00.110, Z00.111, Z00.121, Z00.129, Z00.2, Z00.3, Z01.411, Z01.419, Z02.5 Z76.1, Z76.2 |

## Best Practices

- Educate caregivers and patients on the importance of preventative care visits.
- Educate staff to schedule member well-care visits.
- Remind caregivers of appointments by text or phone call.
